

Safe Driving on and Around Jobsites

Introduction

Jobsite traffic changes as work progresses. Uneven ground, edges, pedestrians, overhead hazards, and poor visibility require a route and traffic-control plan suited to the machine and task.

Hazards & Controls

Use authorized routes, follow site right-of-way rules, and keep people separated from moving equipment. Stay within speed limits and slow further for conditions. Maintain safe clearance from excavation edges, structures, other vehicles, and overhead lines under the applicable rules.

Operate only when trained and authorized for the machine. Use the required restraint and warning systems, maintain a safe stopping distance, and avoid phones or other distractions. Stop if visibility, ground support, fatigue, or congestion prevents safe movement. Never carry unauthorized riders.

Follow the manufacturer instructions and employer's task-specific procedures for this equipment. These awareness notes do not qualify an operator, authorize a task, or replace required training and inspection.

Safety Reminders

Keep people clear of moving equipment and suspended loads. Stop for lost communication, unsafe clearance, equipment defects, or changing conditions. Reassess and restore controls before resuming work.

Engagement Questions

What route hazards or changing conditions require us to slow down or stop?

What site-specific hazards or changes would make us stop work?

Sources and use notice

OSHA: Construction Safety and Health

OSHA: Off-Highway Construction Vehicles
